Effect of the Tohoku Earthquake on the Production of Communications ASICs

The MMA would like to offer sincere condolences and sympathy to the victims of the Tohoku earthquake in Japan.

The factory that manufactures MECHATROLINK communications ASICs was hit by the Tohoku earthquake, and this may cause difficulties in the supply of parts. Due to such difficulties, the Yaskawa Electric Corporation, who is the dealer of MECHATROLINK communications ASICs, might be obliged to make adjustments in the delivery schedule for the following ASICs.

1. ASICs with Possible Shipment Delays

All models of MECHATROLINK-II communications ASIC

All models of MECHATROLINK-I communications ASIC

Note: The MECHATROLINK-III communications ASICs are manufactured at another factory, and no production difficulties have yet been reported.

For more detailed information, contact the representative or sale office of the Yaskawa Electric Corporation.

The MMA, on behalf of Yaskawa Electric and other MMA dealers, sincerely apologizes for any inconvenience and appreciates your patience and understanding during this difficult time.
