Design World Magazine along with its' online community, www.designworldonline.com today announced the winners of the 2008 Leadership in Engineering program. Leadership in Engineering is an industry recognition program to acknowledge engineering leadership across several disciplines. Design World users have cast their vote and we are pleased to congratulate and celebrate the winners.

Design World recognizes the following companies by category - Advanced Materials: Universal Air Filter, Electrical & Electronics: Phoenix Contact, Engineering Services: Protomold, Fastening & Joining: J.W. Winco, Fluid Power: Hydraforce, Mechanical: Arrow Gear Motion, Control: Lin Engineering, Networks: Mechatrolink, Switches & Sensors: All Sensors, and Software: National Instruments.

All participating companies are profiled online at www.designworldonline.com/leadership. Design World experienced a 98% increase in voting based on year-over-year voting totals. The voting is enabled online and accuracy is ensured via a registration-based method.

The 2009 Leadership program kicks off in January 2009 in conjunction with the entire Design World online network and new engineering social media site, www.EngineeringExchange.com supporting and encouraging online participation.

About WTWH Media, LLC

WTWH Media, LLC is leading innovation in the b-to-b media space with Design World Magazine and the Design World Network of community websites. The Design World Online network delivers over 7 million monthly page views with 390,000 registered users making it the fastest growing and most extensive online offering serving the design engineering market. All properties are focused on serving the design engineer, machine builder and OEM in several growth markets including medical, packaging, semiconductor, and factory automation. More information at

www.designworldonline.com.
